Model 377A15 is a 1 in (25 mm) prepolarized microphone for pressure field applications where low amplitudes need to be accurately measured. The large diaphragm size and high sensitivity allows for low amplitudes to 10 dB(A) to be measured, making them an excellent choice for audiometer calibration, ear simulators, sound booth tests, and environmental testing.

Pressure field response microphones are typically intended to be used in small closed couplers, confined spaces, or flush mounted to hard reflective surfaces.

**STANDARDS COMPLIANCE**
- IEC 61094-4 WS1P compliant, and designed to be used in an IEC 61672 Class 1 compliant system for sound level meter use
- Calibration reference microphone traceable to NIST, PTB or DFM National Labs
- PCB calibration service accredited to ISO 17025, ANSI-Z540.3 by A2LA or ILAC

**POLARIZATION VOLTAGE – ICP® (0V) PREPOLARIZED**

PCB® is the inventor of ICP® sensor power technology. All manufacturers of IEC 61094-4 compliant prepolarized (0V) microphones use the technology that PCB developed. Prepolarized microphones operate on 2-20 mA constant current supply and use coaxial cables resulting in significant per channel cost savings over the PCB 200V models. Other ICP® compatible sensors such as accelerometers, force, strain, and pressure sensors use the same power supplies and cables as prepolarized microphones, further reducing set-up time and initial investment costs.
**PCB® QUALITY COMMITMENT**

PCB is uniquely equipped with a state of the art, CNC machining facility, allowing control over quality, pricing, and delivery. Investments in clean rooms, anechoic, and environmental test chambers, combined with our rigorous testing and aging process, ensures our products will survive in demanding environmental conditions. PCB has the industry’s best 5-year warranty with a “Total Customer Satisfaction” policy.

**OPTIONAL ACCESSORIES**

- **426E01** – 1/2” ICP® preamplifier
- **HT426E01** – 1/2” preamplifier, high temperature (125° C)
- **079B25** – 1” microphone to 1/2” preamplifier adapter
- **CAL250** – handheld calibrator
- **ACS-20** – microphone calibration
- **ACS-42** – microphone system calibration
