

Aerospace Engine Dynamic Blade Loading Monitoring

Torque telemetry of strain gage signals on inducer and
quill shafts of an axial flow pump

Application: Aerospace Engine Dynamic Blade Loading Monitoring

Wireless torque telemetry of strain gage signals on inducer and quill shafts of an axial flow pump

Industry: Aerospace

Product: [AT-7000](#)

Parameters measured: Torque

A major aerospace company needed a reliable and compact method of monitoring the dynamic blade motion of a rocket's pump at 6000 RPM. The wireless transmission of strain measurements through use of a center-of-shaft mounted AT-7000 multichannel digital telemetry system provided the desired dynamic torque information. With an easy to operate turn-key installation, signals were measured, digitized, and transmitted from eight channels of 350 ohm strain gages. The AT-7000 provided all excitation and signal conditioning necessary for the strain gages, and also provided remotely controlled shunt calibration for all channels. Sample rates of 5888 samples per second provided DC to 2 kHz bandwidth signal reconstruction at the remote Receiver.

Benefits:

- Compact center of shaft design for high G force
- Induction powered- no batteries
- EMI resistant digital telemetry
- Anti-aliased data
- Precision measurements with good bandwidths
- No slip rings; nothing to wear or maintain

The picture above-left shows the Transmitter's electronics modular design for the 8 strain measurements; on the upper right, the electronics are shown in a rapid-prototype housing prior to insertion in a metal coupling. The exterior of the coupling, with a glass laminate induction power pickup coil assembly is shown in the lower left picture. The Receiver (digital to analog outputs device) is shown on the lower right.

The AT-7000 can also be configured in a clamp collar for mid-shaft mounting, and can be used to measure rotor temperatures, voltages and currents, detection of ground faults, and torsional vibration.

What are divisions of PCB Piezotronics?

PCB Piezotronics, a member of the PCB Group families of companies, has five major divisions, all of which offer targeted sensor technologies. These divisions are supported by an active outside direct sales force of Field Application Engineers, as well as international direct sales offices throughout the world. Individual PCB Piezotronics divisions, locations and their primary product specialties include:

 **PCB PIEZOTRONICS**^{INC.}

Depew, NY, USA - www.pcb.com – Piezoelectric, ICP®, piezoresistive & capacitive pressure, acoustic, force, torque, load, strain, shock & vibration sensors.

 **AEROSPACE & DEFENSE**
A PCB PIEZOTRONICS DIV.

Depew, NY, USA - www.pcb.com/aerospace – Sensors & Instrumentation for aerospace & defense applications, including air and spacecraft testing.

 **AUTOMOTIVE SENSORS**
A PCB PIEZOTRONICS DIV.

Novi, MI, USA - www.pcb.com/auto – Sensors & Instrumentation for automotive testing, including modal analysis; NVH; component durability; powertrain testing; vehicle dynamics; safety and regulatory testing.

 **IMI SENSORS**
A PCB PIEZOTRONICS DIV.

Depew, NY, USA - www.imi-sensors.com – Industrial vibration sensors, bearing fault detectors, mechanical vibration switches, panel meters, cables & accessories for predictive maintenance and equipment protection.

 **LARSON DAVIS**
A PCB PIEZOTRONICS DIV.

Depew, NY & Provo, UT, USA www.larsondavis.com – Precision microphones, sound level meters, noise dosimeters, audiometric calibration systems.

 **PCB PIEZOTRONICS**^{INC.}
MEMS ADVANCED DESIGN CENTER

San Clemente, CA, USA - www.pcb.com – Research & development engineering center for special technologies.

Seattle, WA, USA - www.pcb.com – Process development and fabrication of MEMS sensors.

 **PCB LOAD & TORQUE**
A PCB PIEZOTRONICS DIV.

Farmington Hills, MI, USA - www.pcb.com/LoadAndTorque – Designs and manufactures high quality, precision load cells, wheel force transducers, torque transducers, telemetry systems, and fastener torque-tension test systems.

PCB® Group Companies:

 **TMS DYNAMIC METROLOGY**
A PCB GROUP COMPANY

Cincinnati, OH, USA - www.modalshop.com – Global leader in dynamic calibration offering a complete line of automated calibration systems and recalibration services to support dynamic vibration, pressure and force sensors in applications such as: national standards, commercial labs, government/military research, consultancies, and industrial/plant floor operations.

Rochester, NY, USA - www.sti-tech.com – Mechanical engineering consulting firm specializing infinite element analysis, advance analytical techniques, experimentation, technology development, & design optimization for turbo machinery, industrial machine systems & mechanical structures.

 **ACCUMETRICS**^{INC.}
A PCB GROUP COMPANY

6 British American Boulevard Suite 103-F, Latham, NY 12110 USA
Phone 518-393-2200 ■ Fax 716-684-0987 ■ Email telemetry@pcb.com
