

Joint Simulators

For Use in Calibration & Certification of Power Tools

Highlights

- Easily configured soft, medium, or hard joints
- Robust and durable design
- Bench-top mounting
- Reversing drive

Applications

- Power Tool Testing
- Power Tool Setup
- Performance Verification

Model 102004-02451

PCB Load & Torque Division's RS Technologies Series JS2000 Joint Simulators are ideal for calibrating and certifying pneumatic and electric power tools. These devices are rugged and durable enough for use in tool calibration and repair operations, and feature sturdy welded aluminum construction with an adjustable reaction bar mounting to accommodate most power tools. The durable steel spring washers are easily configured to simulate soft, hard, or medium joint rates. High quality bushings are used throughout to minimize the effects of friction. Both units feature a reversing drive to reset the simulator for the next test.

As with all PCB® instrumentation, these products are complemented with toll-free applications assistance, 24-hour technical service, and are backed by a no-risk policy that guarantees total customer satisfaction or your money refunded.

Model No.	Capacity	Size (H x W x D)	Weight
102000-02201	15 to 148 lbf-ft 20 to 200 Nm	14.75 x 27.50 x 14.00 in 374.65 x 698.50 x 355.60 mm	35 lb 16 kg
102004-02451	74 to 332 lbf-ft 100 to 450 Nm	16.25 x 36.50 x 16.00 in 412.75 x 927.10 x 406.34 mm	45 lb 20 kg
