SERIES 426

PREAMPLIFIERS FOR MEASUREMENT MICROPHONES

- Low electrical noise specifications
- Low attenuation/gain specifications
- 20 Hz filter available
- A-Weight filtering available
- Vent holes for faster stabilization and consistent measurements
- 10 dB gain available
- High temperature
- For use with 1/4" and 1/2" microphones (adapters for 1/8" and 1" microphones)
- Interchangeable with competitive models
- CE compliant

USE OF SERIES 426

Preamplifiers allow high impedance signals to be converted to low impedance signals. This minimizes stray capacitance, allows for higher frequency measurements, and longer cable lengths to be utilized. PCB® manufactures preamplifiers for test and measurement microphones.

POLARIZATION VOLTAGE – ICP® (0V) PREPOLARIZED

PCB is the inventor of ICP® sensor power technology. All manufacturers of IEC 61094-4 compliant prepolarized (0V) microphones use the technology that PCB developed. Prepolarized microphones operate on 2-20 mA constant current supply and use coaxial cables resulting in significant per channel cost savings over the PCB 200V models. Other ICP® compatible sensors such as accelerometers, force, strain, and pressure sensors use the same power supplies and cables as prepolarized microphones, further reducing set-up time and initial investment costs.
PCB® QUALITY COMMITMENT

PCB is uniquely equipped with a state of the art, CNC machining facility, allowing control over quality, pricing, and delivery. Investments in clean rooms, anechoic, and environmental test chambers, combined with our rigorous testing and aging process, ensures our products will survive in demanding environmental conditions. PCB has the industry’s best 5-year warranty with a “Total Customer Satisfaction” policy.

PREAMPLIFIERS FOR 1/2" (12MM) MICROPHONES (AND 1/4" AND 1/2" MICROPHONES WITH OPTIONAL ADAPTERS)

When selecting a preamplifier it is important to choose one that is optimal for your application, is reliable and is manufactured by a company that is easy to do business with. Our products are backed by a best-in-class, 5 year warranty and our “Total Customer Satisfaction” (TCS) no risk policy. Application support is available from the 24 Hour SensorLine™.

“A-WEIGHTING” FILTER
MODEL 426B02

- In-line with BNC connectors
- Powered by 4 mA constant current
- ICP® compatible

PCB Piezotronics, Inc. is a designer and manufacturer of microphones, vibration, pressure, force, torque, load, and strain sensors, as well as the pioneer of ICP® technology used by design engineers and predictive maintenance professionals worldwide for test, measurement, monitoring, and control requirements in automotive, aerospace, industrial, R&D, military, educational, commercial, OEM applications, and more. With a worldwide customer support team, 24-hour SensorLine™, and a global distribution network, PCB® is committed to Total Customer Satisfaction. Visit www.pcb.com for more information. PCB Piezotronics, Inc. is a wholly owned subsidiary of MTS Systems Corporation. Additional information on MTS can be found at www.mts.com.
