ACCELEROMETERS

The most extensive offering of dynamic sensors from any manufacturer; utilizing piezoelectric and MEMS sensing elements with ICP®, charge, and DC voltage outputs.

- Over 200 stock models ranging from 1.0 μg to 200,000 g
- Frequency range: 0 Hz to 26 kHz
- Operating temperatures from -452 to +1,200 °F (-269 to +650 °C)
- Sensitivities from 0.05 mV/g (shock) to 10.0 V/g (seismic)
- Special models for high temperature, cryogenics, high frequency/filters, isolation

FORCE SENSORS

Dynamic and quasi-static sensors used in actuation, impact, impulse, reaction, and compression / tension; comprised of force rings, force links, and impact sensors.

- Over 50 models ranging from 10 lb to 100,000 lb (44.5 N to 444.8 kN)
- Frequency range: 0.0003 Hz to 100 kHz
- Operating temperatures from -100 to +400 °F (-73 to +204 °C)
- Sensitivities from 0.05 mV/lb to 2,200 mV/lb
- ICP® & charge outputs available
ACOUSTICS

A diverse offering of sound measurement products, including prepolarized (0V), externally polarized (200V), and array microphones. Complemented by an assortment of preamplifiers, signal conditioners, filters, handheld calibrators, and accessories.

- Dynamic ranges from 6.5 dBA to 183 dB
- Frequency range: 0.1 Hz to 100 kHz
- Operating temperatures from -40 to +1,472 °F (-40 to +800 °C)
- Sensitivities from 0.25 mV/Pa to 450 mV/Pa
- Special models for 48V phantom power, water and dust concerns, ATEX hazard approved, and more

PRESSURE SENSORS

Dynamic and static pressure sensors with the ability to measure small pressure fluctuations at high static pressures. Used in many applications such as: blast / ballistic, wind tunnels, hydraulic / pneumatic systems, and general pressure measurement requiring fast rise time with a wide dynamic range.

- Over 100 models ranging from 1 psi to 120,000 psi
- Frequency range: 0 Hz to 1 MHz
- Operating temperatures from -320 to +1,200 °F (-196 to +650 °C)
- Sensitivities from 0.05 mV/psi to 5,000 mV/psi
- Special models for high temperature, cryogenics, media compatibility, isolation

Endevco is an assumed name of PCB Piezotronics of North Carolina, Inc. and is a designer and manufacturer of sensors, instrumentation, and cables for vibration, shock and pressure measurements, known for innovation in sensor technology for the automotive, aerospace and military markets. Visit www.endevco.com for more information. PCB Piezotronics of North Carolina, Inc. (doing business as Endevco) is a wholly owned subsidiary of PCB Piezotronics, Inc. PCB Piezotronics, Inc. is a designer and manufacturer of microphones, vibration, pressure, force, torque, load, and strain sensors, as well as the pioneer of ICP® technology used by design engineers and predictive maintenance professionals worldwide for test, measurement, monitoring, and control requirements in automotive, aerospace, industrial, R&D, military, educational, commercial, OEM applications, and more. With a worldwide customer support team, 24-hour SensorLineSM, and a global distribution network, PCB® is committed to Total Customer Satisfaction. Visit www pcb.com for more information. PCB Piezotronics, Inc. is a wholly owned subsidiary of MTS Systems Corporation. Additional information on MTS can be found at www.mts.com.
